PROFILE

Front-end developer with 4+ years of React and TypeScript in production. At Fida Solutions I own the front-end of GIS and public-sector applications for Romanian institutions. I also built and run invitatio.ro, a free wedding planner, end to end, from the React app to its Hono and PostgreSQL back-end.

EXPERIENCE

Front-end Developer · Fida Solutions

Jun 2025 - Present · Remote

- Build GIS platforms for Romanian public institutions: interactive maps, data layers and filters.
- Develop multi-step forms and workflows that citizens and civil servants rely on to submit and process requests.
- Took over the front-end architecture: shared components, state management with Redux Toolkit and code standards.
- Apply the public sector's accessibility requirements so that the applications work for everyone.
- Mentored two junior developers and brought practices from earlier projects to the rest of the team.

Front-end Developer · Luminos Software

Sep 2022 - Jun 2025 · Cluj-Napoca

Started as a Full Stack Intern, Jun – Aug 2022

- Built responsive UI components and PWAs for client projects with React, TypeScript, Tailwind CSS and Redux Toolkit.
- Worked directly with designers on their mockups and took part in code reviews as both author and reviewer.
- Grew from intern to working independently, taking tasks from requirements to production.

QA Tester · Quantic Lab

Nov 2021 - Feb 2022 · Cluj-Napoca

- Tested web applications, reported bugs with exact reproduction steps and checked features before releases.

Earlier: working student at Bosch Romania (2021) · intern at SDEE Transilvania Nord, Baia Mare (2020)

PROJECTS

invitatio.ro · founder, sole developer

2025 - Present

A free wedding planner in Romanian for couples who organize their own wedding.

- Both partners work on the same data from separate accounts, with live sync.
- Drag-and-drop seating plan; prerendered public pages for SEO, with the planner as an SPA behind login.
- My own back-end: a Hono API with Drizzle and PostgreSQL on Neon, serverless on Vercel, plus a daily job and emails.

React · TypeScript · HeroUI · TanStack Query · Hono · Drizzle · PostgreSQL · Vercel

Vanilla Cleaning · design, development and SEO

2025

Website for a carpet cleaning business in Cluj-Napoca, with prerendered pages and content editable in TinaCMS. About 40% of last year's visitors came from Google search.

React · Tailwind CSS · TinaCMS · SEO

iampaulpop.ro · portfolio

2025 - Present

Bilingual portfolio with a MapLibre demo of public services in Maramureș: filters, search, a list synced with the map and routing to the nearest institution.

SKILLS

Front-end	React, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, shadcn/ui, Radix UI, HeroUI, TanStack Query, React Router, Zod, Motion, Storybook, PWAs (Framework7)
